

## Continuing Review Form IBC Protocols

The IBC may approve protocols for up to three years duration; however, submission to and approval by the IBC of a continuing review form is required annually during the protocol approval period.

This form was developed to obtain information about study experiences to discuss with the Institutional Biosafety Committee (IBC) in their review of approved research. Continuing review of active protocols is as important as the initial review. It is only1 (e) 16 (iv2m BT 46 0 0 46 330 218 Tm /TT1 1 Tf ( ) Tj ET Q q 0.24 0 0 0.24

List the host-vector systems used in your lab:

Provide a brief update on the progress made in achieving the specific aims of the protocol.
